■ **BARRISOL®** - PROUD SPONSOR OF ASPTT-MULHOUSE, FRENCH CHAMPIONS 2017

As a company who are extremely proud of their region, the sports teams that represent it and the talent developed there, **Barrisol®** have always made it their goal to shine a spotlight on the sporting events and teams closest to them.

Just think of the Tour Alsace that we support each year, or even the “Future” tournament hosted by the Illberg tennis club in association with **Barrisol®** for more than 22 years, to name just a couple of examples. Yet Barrisol's support isn't limited to the region. At an international level, **Barrisol®** are proud sponsors of France's men's wheelchair basketball team, keen to aid development and to change how people view the sport.

In a similar spirit, **Barrisol®** are delighted to announce their new partnership with the women's volleyball team ASPTT-Mulhouse – French Champions in 2017, no less! You can see the team in action at home at the Palais des Sports, and their calendar developed in partnership with **Barrisol®** is now available.

Exceptional projects

■ PROJECT SHEETS ATTACHED

A tribute to the mime artist Marcel Marceau

Exhibition made using **Artolis®** panels from **Barrisol®**, a partner of this event.

I

Barrisol® Cocoon by Ross Lovegrove

Exceptional projects

■ **BARRISOL®** COCOON BY ROSS LOVEGROVE

“Changing Creations”

The Pompidou Centre exhibition devoted to the work of industrial designer **Ross Lovegrove** demonstrates a sense of harmony between creativity, technology and nature. A sustainable vision for the world.

The **Barrisol® Cocoon** is a design used for projections, made using steel and employing the double skin technique with stretched gold fabric **Mirror® Gold** on the outside, and black on the inside, allowing light to be absorbed. At the centre of this piece, plunged into the black, there is a small area where digital animations designed by the architect Alisa Andrasek, are projected. Fluorescent light filaments continuously sweep across the Cocoon, giving a hypnotic, aerodynamic effect, while a soundtrack plays in the background.

Printed **Barrisol®** fabric panels were placed next to the Ross Lovegrove pieces for decoration and to complement the British designer's outstanding work.

Exceptional projects

■ FRANCK SORBIER & **BARRISOL**®

For the spring-summer 2017 Fashion Week, the creativity of fashion designer **Franck Sorbier** & the expertise of **Barrisol**® came together to sweep the guests at the Pavillon des Champs-Élysées away with a sense of “Sweet Madness”.

Cocoons made from carefully torn paper burst forward from stunning sepia-coloured dresses, inspired by the drawings of Georges Zipélius (a 19th century illustrator). This is set against a backdrop of large-format **Barrisol**® prints, made using the Adolphe Braun photo discovered in the archives of the Museum of Printed Textiles in Mulhouse.

Visit our website for more information: www.barrisol.com

Exceptional projects

■ ELT 3D® LIGHTING IN GERMANY

By : EL SMART MATERIALS.

An exclusive collaboration began in July 2016 between **EL Smart Materials** & **Barrisol® - Normalu® S.A.S.**

Following a period of adjustment and animated discussions, the first projects were launched, to great success.

A wonderful example of this can be found in the newly-designed entrance hall of an IT company, with **Barrisol® ELT 3D®** circular lights, 1.4m and 1.9m in diameter, made using MI5 fabric.

These three lights guarantee a remarkable atmosphere, day or night.

Exceptional projects

■ THE **ARTOLIS®** PROJECT IN SPAIN

Artolis® printed **Lighting®** (with pattern connection)

Promoter: PROFU, S.A. - Urban Center – Murcia.
Architect: Javier Zueco Sánchez – Lorenzo Tomás Gabarrón

22m long **Artolis® Light® Print®** backlit fabric.

The owner of the property wanted to light the room in such a way as to give a unique sense of depth.

Thus the concept of designing a printed fabric mural was born with the idea being to compensate for the constant sense of darkness.

His aim was to create a perspective using a panoramic photograph of the city of Murcia in Spain, focusing on its towers.

The backlit Artolis® system was the ideal solution, allowing the artist to create an open and welcoming atmosphere, like a window onto the world.

Exceptional projects

■ 42ND STREET - STAGE MUSICAL - **BARRISOL® MIRROR**

The star of '42nd Street', Broadway's biggest musical in London, is its **Barrisol® Mirror** frame.

By : Barrisol® Welch
